Dear Eric,

It is my pleasure to write a letter in support of your material and lesson plans for wind, solar, coal, and nuclear energy.

The Sustainable Energy Fund is grateful for your contribution of the material and lesson plans and we intend on posting them on our website for those interested in learning more about renewable energy. Your knowledge on the various forms of energy is an asset to the community and we are pleased to help provide renewable energy teaching tools.

In conclusion, the Board of Sustainable Energy Fund and I are proud to accept your donation of this material and fully support your mission of renewable energy education.

Sincerely,

Jennifer Hopkins  
President
