CYBER SECURITY MILESTONES 1-7," REPORT 05000277/2013404 AND

Dear Mr. Pacilio:

On February 15, 2013, the U.S. Nuclear Regulatory Commission (NRC) completed a security temporary instruction inspection at your Peach Bottom Atomic Power Station, Units 2 and 3. The inspection covered the implementation of interim milestones associated with your cyber security program, as outlined in your approved cyber security plan (CSP) and described in Temporary Instruction (TI) 2201/004, "Inspection of Implementation of Interim Cyber Security Milestones 1-7." The enclosed inspection report documents the inspection results, which were discussed on February 15, 2013, with Mr. Michael Massaro, Site Vice President, and other members of your staff. On April 1, 2013, the NRC conducted an exit meeting by telephone with members of your staff to further discuss the inspection results.

The inspection examined activities conducted under your license as they relate to safety and compliance with the Commission's rules and regulations and with the conditions of your license related to the implementation of interim cyber security milestones. The inspection was conducted in accordance with NRC TI 2201/004, "Inspection of Implementation of Interim Cyber Security Milestones 1-7." The team reviewed selected procedures and records, observed activities, and interviewed personnel. No findings were identified during this inspection.
