

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 6, 2009

Mr. Charles G. Pardee
President and Chief Nuclear Officer
Exelon Nuclear
Exelon Generation Company, LLC
4300 Winfield Road
Warrenville, IL 60555

SUBJECT: THREE MILE ISLAND NUCLEAR STATION, UNIT 1 - CORRECTION TO THE
TECHNICAL SPECIFICATIONS (TAC NO. 73019)

Dear Mr. Pardee:

On July 6, 1989, the U.S. Nuclear Regulatory Commission (NRC) issued Amendment No. 150 to Facility Operating License No. DPR-50 for Three Mile Island Nuclear Station, Unit 1 (TMI-1). This amendment can be found at Agencywide Documents Access and Management System (ADAMS) Accession No. ML003765295. The amendment consisted of changes to the facility operating license and the technical specifications (TS) in response to the TMI-1 application dated April 28, 1989 (ADAMS Accession No. 8905080086), and supplements dated May 18, 1989 (ADAMS Accession No. 8905310212), and June 19, 1989 (ADAMS Accession No. 8906260227).

The amendment removed cycle-specific core parameter limits from the TS and added an administrative requirement to submit a Core Operating Limits Report to the NRC, prior to each core reload.

During the ongoing TMI-1 license renewal review, it was identified that certain figures that were the subject of the application dated April 28, 1989, were present in the NRC version of the TMI-1 TS, but not in the licensee version. This discrepancy was traced to an incorrect insert/remove page included in the issuance letter for Amendment 150. This insert/remove page did not specify the removal of Figures 3.5-2A through 3.5-2L as it should have. Therefore, please remove Figures 3.5-2A through 3.5-2L from the TMI-1 TS, if you have not already done so.

Please contact me at 301-415-2833 if you have any questions.

Sincerely,

A handwritten signature in black ink that reads "Peter Bamford".
