RE: Environmental Education Materials

Dear Eric:

Thanks so much for sharing with my office the very comprehensive material developed by your organization for use in Pennsylvania's schools. According to our review, the material is aligned to Pennsylvania's academic standards and includes lesson plans for wind, solar, coal, and nuclear energy.

Congratulations on a job well done with this project. I know our schools and teachers will appreciate receiving this material as they work to educate our young people on the environment and how we all must be good and prudent stewards of our planet.

Sincerely,

JEFFREY E. PICCOLA
